Professional Summary

Software Engineer (fresher) with a strong foundation in **Java, Object-Oriented Programming, Data Structures & Algorithms, and SQL**, who has solved 150+ DSA problems in Java and built two full-stack applications with **Spring Boot, React.js, and PostgreSQL**. Developed an e-commerce platform with JWT authentication, role-based authorization, and Razorpay integration, and MediPharm, an AI-assisted pharmacy application with prescription OCR and fuzzy medicine search across 250k+ records. Completed a Full Stack Web Development internship focused on frontend development.

Technical Skills

Languages: Java, SQL, JavaScript, HTML5, CSS3 **Core Concepts:** OOP, Data Structures & Algorithms, Collections Framework, Exception Handling, Multithreading, Design Patterns, Problem Solving **Backend:** Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JWT, REST API Design, Maven **Frontend:** React.js, Axios, Bootstrap, Tailwind CSS, Responsive Design **Database:** PostgreSQL, MySQL, JDBC, SQL Joins & Query Optimization **API Testing & Tools:** Postman, Swagger, Docker, Git, GitHub **Cloud & Deployment:** AWS (Serverless fundamentals: Lambda, API Gateway, SQS, SNS), Render, Vercel, Cloud-Hosted PostgreSQL

Projects

MediPharm – AI-Powered Pharmacy Platform | Java, Spring Boot, React, PostgreSQL GitHub | Live Demo

- Extended the e-commerce platform into a pharmacy application with prescription upload, Tesseract OCR, and AI-based medicine name normalization.
- Self-hosted an Indian medicine dataset in PostgreSQL and implemented fuzzy search over 250k+ records using `pg_trgm` for medicine matching.
- Designed a Java-native heuristic (EXIF metadata and pixel-level analysis) to flag suspected AI-generated prescription images before OCR.
- Deployed the application live with the React frontend on Vercel and the Spring Boot backend and PostgreSQL database on cloud hosting.

E-Commerce Application | Java, Spring Boot, React, PostgreSQL GitHub

- Developed REST APIs in Java and Spring Boot for 5 core modules (Product, Cart, Checkout, Order, Payment) using MVC architecture, consumed by a React frontend through Axios.
- Implemented JWT authentication and role-based access control with Spring Security to secure API endpoints.
- Designed the relational schema in PostgreSQL using Spring Data JPA and Hibernate; integrated Razorpay payments with automated inventory updates.
- Tested APIs with Postman, documented endpoints with Swagger, and deployed the backend on Render with cloud-hosted PostgreSQL.

Experience

Full Stack Web Development Intern Aug 2025 – Nov 2025

Unified Mentor Pvt. Ltd.

- Built the frontend of an internship project using HTML5, CSS3, and JavaScript, turning requirements into responsive, working user interfaces.
- Implemented responsive layouts and interactive features with JavaScript and debugged UI issues across screen sizes and browsers.
- Used Git and GitHub for version control, debugging, and collaboration.

Education

Bachelor of Computer Applications (BCA) Expected 2027

Krupanidhi College of Commerce & Management CGPA: 7.8

Certifications

- AWS Educate: Getting Started with Serverless (Training Badge), AWS Training and Certification. Verify on Credly
- Full Stack Web Development Internship Certificate, Unified Mentor Pvt. Ltd. Verify

Achievements

- Solved 150+ Data Structures and Algorithms problems in Java on LeetCode. Leetcode
- Participated in DECIPHER-X 2026, a national-level 24-hour hackathon (Security Track), St. Francis College, Bengaluru.
