Professional Summary

Java Backend Developer with hands-on experience building and deploying REST APIs using **Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, and PostgreSQL**. Developed an e-commerce backend with JWT authentication, role-based authorization, and Razorpay payment integration, and MediPharm, an AI-assisted pharmacy platform with prescription OCR and fuzzy medicine search across 250k+ records. Completed a Full Stack Web Development internship focused on frontend development and solved 100+ Data Structures and Algorithms problems in Java.

Technical Skills

Languages: Java, SQL, JavaScript, HTML5, CSS3
Backend: Spring Boot, Spring MVC, Spring Security, Spring Data JPA, Hibernate, JWT, REST API Design, Maven
Database: PostgreSQL, MySQL, JDBC, SQL Joins & Query Optimization, Full-Text and Fuzzy Search (`pg_trgm`)
API Testing & Tools: Postman, Swagger, Docker, Git, GitHub
Core Concepts: OOP, Data Structures & Algorithms, Collections Framework, Exception Handling, Multithreading, Design Patterns
Cloud, Deployment & Frontend: AWS (Serverless fundamentals: Lambda, API Gateway, SQS, SNS), Render, Vercel, Cloud-Hosted PostgreSQL, React.js, Axios, Bootstrap, Tailwind CSS

Projects

MediPharm – AI-Powered Pharmacy Platform | Java, Spring Boot, PostgreSQL GitHub | Live Demo

- Extended the e-commerce backend into a pharmacy application with prescription upload, Tesseract OCR, and AI-based medicine name normalization.
- Self-hosted an Indian medicine dataset in PostgreSQL and implemented fuzzy search over 250k+ records using `pg_trgm` for medicine matching.
- Designed a Java-native heuristic (EXIF metadata and pixel-level analysis) to flag suspected AI-generated prescription images before OCR.
- Deployed the application live with the React frontend on Vercel and the Spring Boot backend and PostgreSQL database on cloud hosting.

E-Commerce Backend Application | Java, Spring Boot, PostgreSQL GitHub

- Developed REST APIs in Java and Spring Boot for 5 core modules (Product, Cart, Checkout, Order, Payment) using MVC architecture.
- Implemented JWT authentication and role-based access control with Spring Security to secure API endpoints.
- Designed the relational schema in PostgreSQL using Spring Data JPA and Hibernate.
- Integrated Razorpay payments with order processing and automated inventory updates.
- Tested APIs with Postman, documented endpoints with Swagger, and deployed the backend on Render with cloud-hosted PostgreSQL.

Experience

Full Stack Web Development Intern Aug 2025 – Nov 2025
Unified Mentor Pvt. Ltd.

- Built the frontend of an internship project using HTML5, CSS3, and JavaScript, turning requirements into responsive, working user interfaces.
- Implemented responsive layouts and interactive features with JavaScript and debugged UI issues across screen sizes and browsers.
- Used Git and GitHub for version control, debugging, and collaboration.

Education

Bachelor of Computer Applications (BCA) Expected 2027
Krupanidhi College of Commerce & Management CGPA: 7.8

Certifications

- AWS Educate: Getting Started with Serverless (Training Badge), AWS Training and Certification. Verify on Credly
- Full Stack Web Development Internship Certificate, Unified Mentor Pvt. Ltd. Verify

Achievements

- Solved 150+ Data Structures and Algorithms problems in Java on LeetCode. leetcode
- Participated in DECIPHER-X 2026, a national-level 24-hour hackathon (Security Track), St. Francis College, Bengaluru.
